

CAREER OBJECTIVE

Backend developer with 6 years of experience designing and building scalable web applications using Django and Node.js. Skilled in API development, database design, and performance optimization, aiming to contribute to engineering teams focused on reliability and efficiency.

WORK EXPERIENCE

Associate Web Developer

Mar 2021 - Present

Freelance, Virtual

- Built and optimized CRM Systems using Django for 27+ individual clients including small businesses, schools, and hospitals
- Developed core features: employee management, salary calculation, attendance tracking, performance evaluation, and analytics
- Provided managed hosting services on self-hosted servers and ongoing technical support

Web Developer

Feb 2021 - Present

Freelance, Mumbai

- Developed 20+ custom websites using Django and Django CMS for diverse client needs
- Managed full development cycle: design, development, deployment, and maintenance
- Tech Stack: Django, Python, PostgreSQL, HTML/CSS, JavaScript, Self-Hosting

Junior Software Developer

Aug 2018 - Feb 2021

Matalli Infotech Private Limited, Dombivli

- Developed and maintained internal web applications using Django 2.2 LTS as the primary framework
- Gained strong understanding of project architecture, code organization, and best development practices Worked extensively with Git for version control, collaboration, and efficient code management
- Wrote and maintained unit and database tests to ensure application reliability and stability
- Managed deployments on Linux servers and cloud platforms including AWS and Heroku
- Implemented and worked with CI/CD pipelines to streamline development and release cycles
- Delivered quick patches and bug fixes in production environments with minimal downtime
- Collaborated within a team to balance workload effectively and meet project deadlines

EDUCATION

Bachelor of Science (B.Sc), Computer Science

2014 - 2018

P V G's College Of Science

Senior Secondary (XII), HSC

2014

Science

PEST

Secondary (X), Ssc

2012

Mes

TRAININGS / CERTIFICATIONS

Full Stack Development: Let's Begin

Oct 2025

Internshala Trainings, Virtual

Full Stack Development

Oct 2025 - Apr 2026

Internshala, Virtual

- Fundamentals of Full Stack Development
- Web Page Designing (HTML and CSS)
- Git and GitHub: Version Control
- Websites Development (JavaScript)
- Data Structures and Algorithms (DSA) in JavaScript
- Web Applications Building (React)
- Node.js, Express.js and MongoDB for Web Development

The Complete JavaScript Course 2025: From Zero To Expert!

Jun 2025 - Nov 2025

udemy, Virtual

- Fundamentals
- Dev Skills + Editor Setup
- HTML/CSS
- DOM + Events
- Working of JS
- Data Structures, Strings
- Functions
- Arrays
- Advanced DOM and Events
- OOP with Javascript
- Async JS (promises, async/await and AJAX)
- Modern JS

Microservices With Node JS And React

Apr 2024 - Sep 2025

udemy, Virtual

- Microservices Fundamentals
- Running Services with Docker
- Orchestrating Collections of services with Kubernetes
- Architecture of Multi-Service Apps
- Using a cloud environment
- Response Normalization Strategies
- Database Management and Modelling
- Authentication
- Testing
- Code Sharing
- NATS
- Event Flow
- Worker Services
- Handling Payments
- CI/CD

Python Django - The Practical Guide

Jan 2021 - Aug 2021

udemy, Virtual

- Django Setup
- URL's and Views
- Templates
- Models
- Admin
- Relationships
- Forms
- File Uploads
- Sessions
- Deployment

PORTFOLIO

[Leetcode link ↗](#)

PROJECTS

Master The Coding Interview: Data Structures + Algorithms

Apr 2025 - Jan 2026

udemy, Virtual

- Big O
- Arrays
- Hash Tables
- Linked Lists
- Stacks
- Queues
- Trees
- Graphs
- Recursion
- Sorting
- Searching / BFS / DFS

The Complete Full-Stack Web Development Bootcamp

Jun 2023 - Feb 2024

udemy, Virtual

- Front End Web Dev
- HTML
- CSS
- Bootstrap
- Javascript ES6
- DOM
- jQuery
- Unix Command Line
- Express.js
- EJS
- Git
- API
- Databases
- Postgresql
- React.js

Developed APIs with Node.js and Express.js for Shoppyglobe ↗

Mar 2026 - Apr 2026

- Enhanced the ShoppyGlobe platform by developing a backend with Node.js and Express.js, concentrating on data handling and authentication.
- Utilized MongoDB for effective storage solutions, ensuring cohesive frontend-backend operations.
- Designed RESTful API endpoints to support core features, implementing JWT to fortify security measures.

ShoppyGlobe: An E-commerce Application ↗

Feb 2026 - Mar 2026

- Designed and implemented ShoppyGlobe, a functional e-commerce solution, enabling users to browse products, manage carts, and complete purchases efficiently.
- Engineered a responsive user interface using React and React Router, ensuring effective navigation and a smooth user experience.
- Enhanced the app's functionality by integrating an API for real-time data retrieval and used Redux for seamless cart and state transitions.

Mastering DSA: Arrays, Searching & Sorting ↗

Dec 2025 - Jan 2026

- Built a robust understanding of algorithmic principles by designing solutions tailored to real-world problems.
- Developed proficiency in arrays, searching systems, and sorting mechanisms using JavaScript.

Personal Portfolio Website ↗

Oct 2025 - Nov 2025

- Developed a personal portfolio website with HTML and CSS to effectively showcase skills, projects, and achievements, ensuring professional appeal and accessibility across devices.
- Designed a clean, responsive layout that enhances user experience and interaction, highlighting my front-end development skills and professional online presence.

Developed YouTube-Inspired Platform ↗

Apr 2026

- Developed a YouTube-inspired platform with the MERN stack, including video upload capabilities, authentication, and a responsive user interface.
- Implemented JWT for secure user registration and authentication management.
- Created video management and interaction features, including uploads, user comments, likes, shares, and a seamless video player.

Advanced Problem-Solving in Recursion, Linked Lists, Stacks, Queues, and Trees ↗

Jan 2026 - Feb 2026

- Strengthened knowledge of data structures and algorithms, emphasizing recursion, linked lists, stacks, queues, and trees in JavaScript.
- Developed clean, efficient, and scalable code for real-world applications and interview preparation.

Weather Forecast Application ↗

Dec 2025

- Developed a weather forecast application featuring a user-friendly interface, allowing users to view real-time weather and forecasts for selected locations.
- Implemented asynchronous API calls to fetch weather data and dynamically updated the DOM to present current weather conditions and upcoming forecasts.
- The application was designed to be responsive, ensuring an accessible and seamless experience across multiple devices, and JavaScript was utilized for effective data handling and user interaction.

XO Anime ↗

Oct 2024 - Nov 2024

- Built a Django-based web application leveraging an existing API as the primary data source
- Implemented a unified, site-wide search system aggregating results from 6 different sources
- Developed a custom video player with support for HLS (m3u8) streaming
- Optimized streaming experience by handling CORS constraints, reducing third-party ad interruptions
- Designed and implemented a manga reading interface with multiple view modes, pagination, and keyboard shortcuts
- Focused on user experience and performance across media consumption features
- This project was developed as a personal/hobby project and is not licensed for distribution

SKILLS

- | | | |
|------------------------|-------------------------|-------------------|
| • Django | • Django Rest Framework | • React |
| • JavaScript | • Tailwind CSS | • HTML |
| • CSS | • GitHub | • Data Structures |
| • Redux | • MongoDB | • Node.js |
| • Express.js | • REST API | • Web development |
| • Frontend development | • Backend development | • MERN |
